Question – Who's Here...?

- *Tour Operators ...*
- *Airlines ...*
- *Travel Agencies ...*
- *GDSs ...*
- *Others ...*

• *Key question ... What Happens Every 15 to 20 Years in Almost All Businesses?*

Key Question...

What Happens Every 15 to 20 Years in Almost All Businesses?¹

A management generation changes. “Most of us form our views of the world in our 20’s ... often out of school. Then for 15 to 20 years we carry out the work of others. Only then, do we become the person making the decisions. Unless we have gone back to school to “relearn” what science now knows, our view of the world is 15 to 20 years old !

- *When did you start your career?*
- *When did you last go back to “school”?*
- *What is your current decision making role?*

Hardware Centric

1960's

- **LOTS OF DATA**
- **SOLUTION SPECIFIC**
- **DATA RETRIEVAL**

DRIVEN BY HARDWARE DESIGN ISSUES
MAINFRAME ARCHITECTURES

Software Centric

1970's

- **DATA PROCESSING**
- **STRUCTURED**
- **“CONTAINERIZED”**

**PRIMARY/KEY BUSINESS SOLUTIONS
MINICOMPUTER ARCHITECTURES**

Task Centric

1980's

- **TASK SPECIFIC**
- **ADAPTABLE**
- **PERSONAL USE**

**INDIVIDUALIZED BUSINESS TOOLS
MICROCOMPUER (PC) ARCHITECTURE**

Communications Centric

1990's

• TRANSPARENT

• LAN/WAN's

• INTERNET/INTRANET

**MAKING THE DIFFERENT PLATFORMS
"TALK" TO EACH OTHER**

Communication of Information...

The Same...but NOT the Same

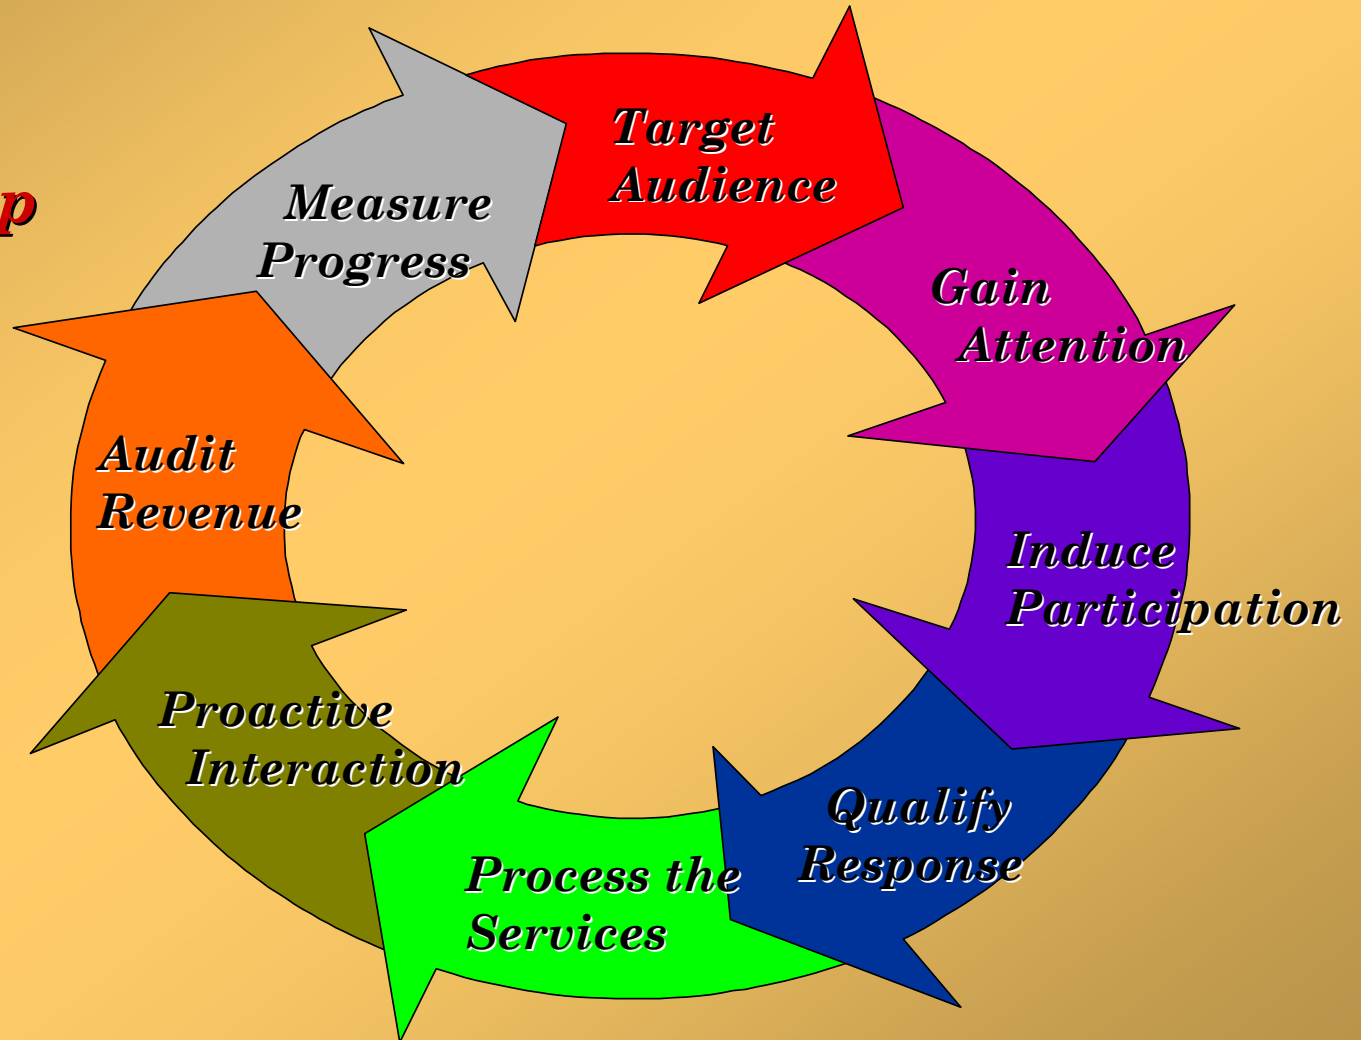

• **Feedback Loop Learning**

~

• **At Digital Speeds**

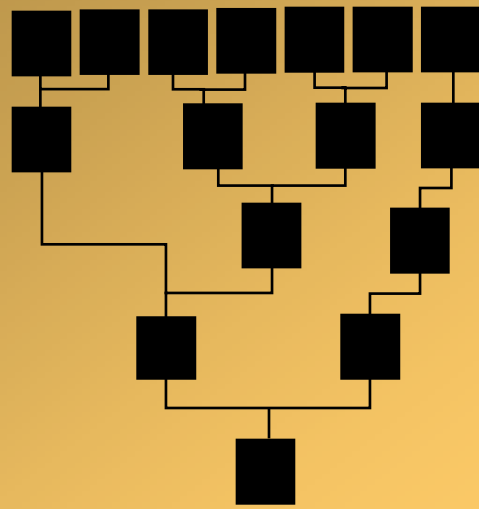

~

• **Increasingly Targeted to Buyer Needs**

Information Transition...

Hierarchical Distribution

Information flows from Vendor(s) through distribution channels to the buyer ...

- *Supplier Power*
- *Supplier Control*

- *Buyer Power*
- *Buyer Control*

Hyperarchy Distribution

When Standards are shared, everyone communicates interactively with everybody else.

New Dynamics of the 2000's...

Interactive Speed

Targeted

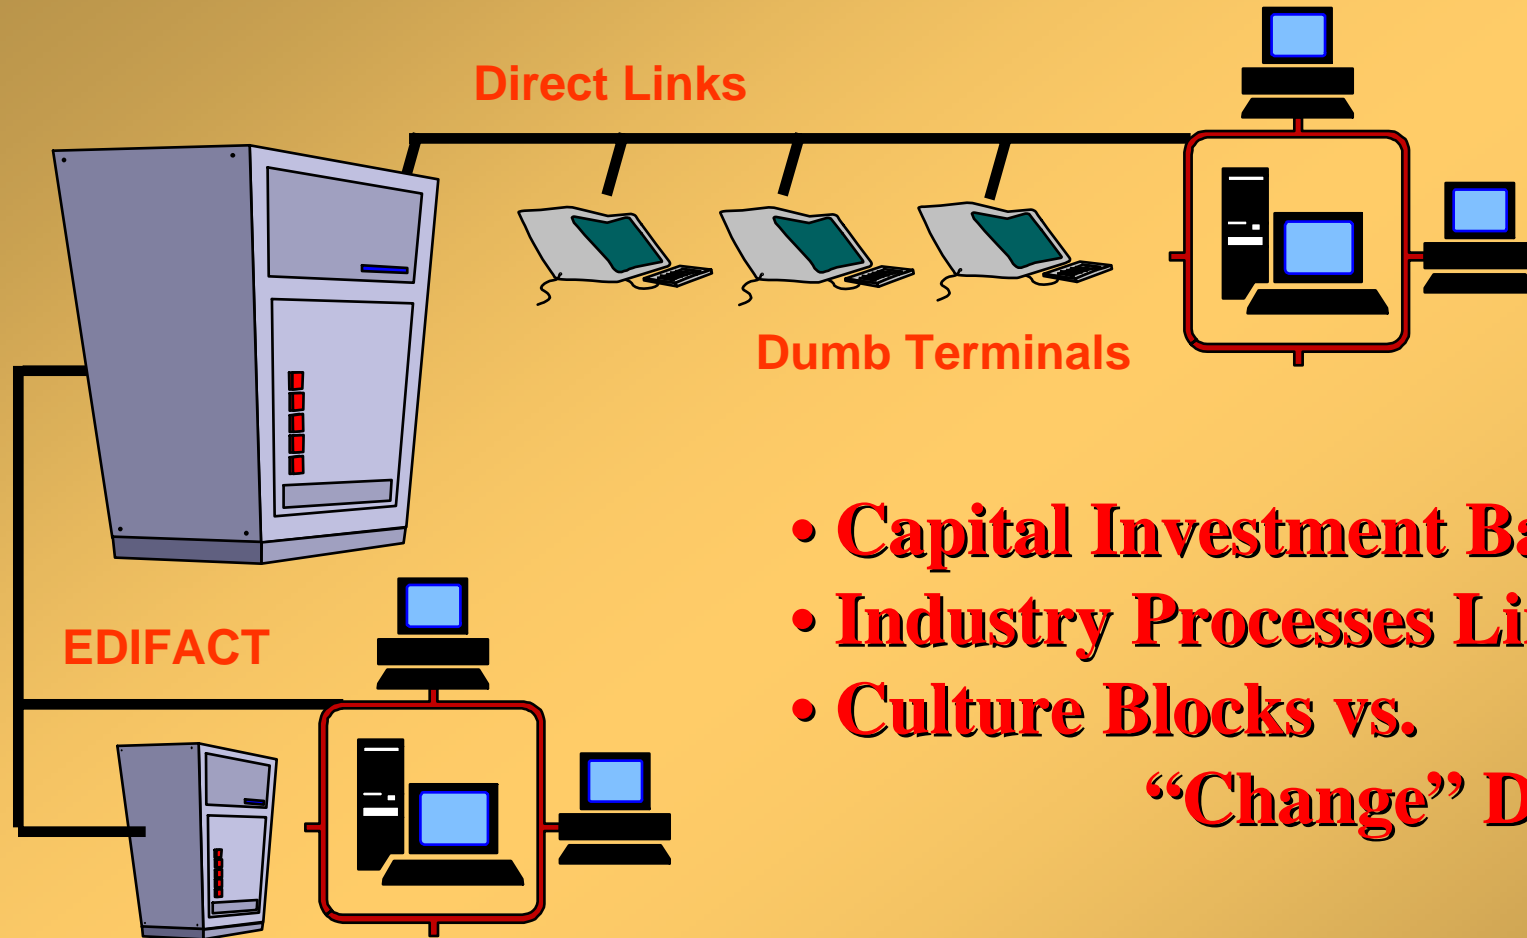

Boundaries

Integrated

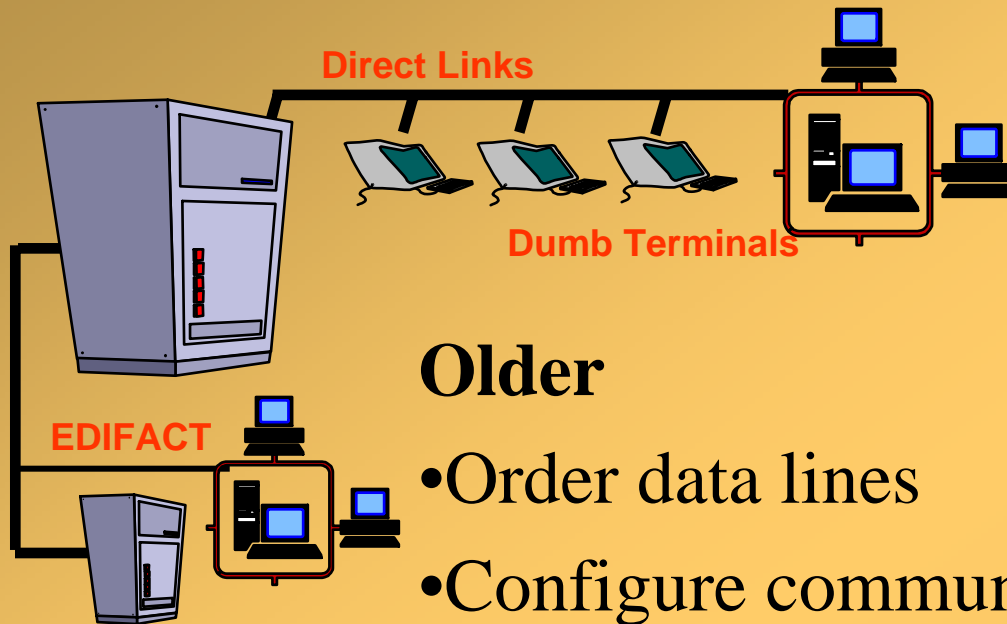

Existing Systems Can't Go Away Soon...

- **Capital Investment Base**
- **Industry Processes Linkages**
- **Culture Blocks vs. “Change” Drivers**

Systems Must Adapt and Blend into Existing Environments

Interactive Distribution Systems...

Older

- Order data lines
- Configure communications
- Tweak SNA, X.25
- Message specifications
- Write Message handlers
- Write applications

Newer

- Use the Internet
- Use TCP/IP
- Use HTTP
- **OTA Standards**
- Available kits
- Write applications

Why create a new industry standard?

- A “language standard” creates a common “thesaurus” of terms in which to facilitate the exchange of information between host computers and with consumers
- Allows the entire travel industry to develop a uniform interface standard only once. Limits duplication of effort between industry parties

Jim Young, Continental Airlines

OTA Chairman of the Board

(airline)

Why XML Environment...

“The specification recommended by OTA removes the constraints imposed by the trade-offs required when computer communications and processing were costly. The specification represents a different approach to exchanging data messages and elements. At its simplest, this approach – called **tagging** – provides each data element with a unique identity tag.”

ASC X12

UN/EDIFACT

IFX Forum

XML/edi Group

American National Standards Institute (ANSI) chartered the Accredited Standards Committee (ASC) X12 to develop uniform standards for interindustry electronic interchange of business transactions – electronic data interchange (EDI) ... relating to ... entities involved in finance, insurance, education, and state and federal governments....

... the UN/ECE Working Party on Facilitation of International Trade Procedures...to cover the development of a standard international trade data terminology and a uniform system for use in automatic processing and transmission of trade data.

The IFX Forum is to facilitate efficient and effective development of a family of global business requirements and specifications, which result in an open and interoperable foundation for online financial services.

... to establish standards for commercial electronic data interchange ... and covers all industrial and service operations, including services such as insurance, healthcare, travel and interactive home shopping.

OTA White Paper...

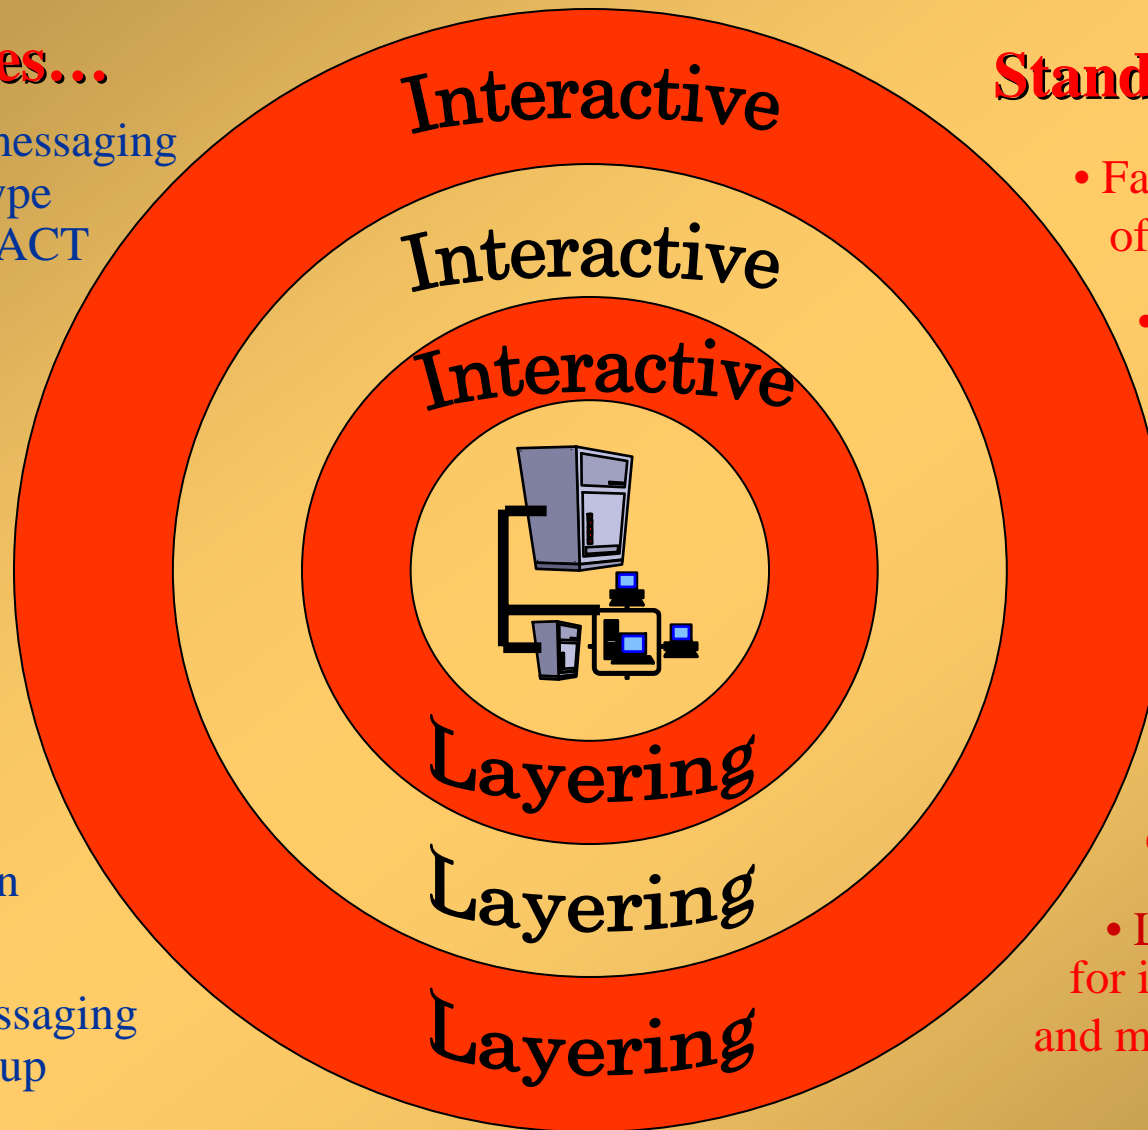

“One outstanding issue, as this document went to press, is cooperation with HITIs, the Hospitality Technology Integrations Standards committee of the American Hotel and Management Association. There is overlap between the XML work of OTA and HITIS. It is the intent of OTA to cooperation with any such group to minimize duplication and maximize interoperability. It is disappointing that this seems impossible with such a closely-related organization as HITIS.”

OTA White Paper, Page. 19, ©OTA February 2000, Nick Lanyon

An Example ...

Airline issues...

- Two types of messaging
Type B Teletype
Type A EDIFACT
- Limitations in flexibility
- Markets evolving rapidly
- Suppliers are partnering and alliances forming
- Communication is increasing
- Traditional messaging is not keeping up

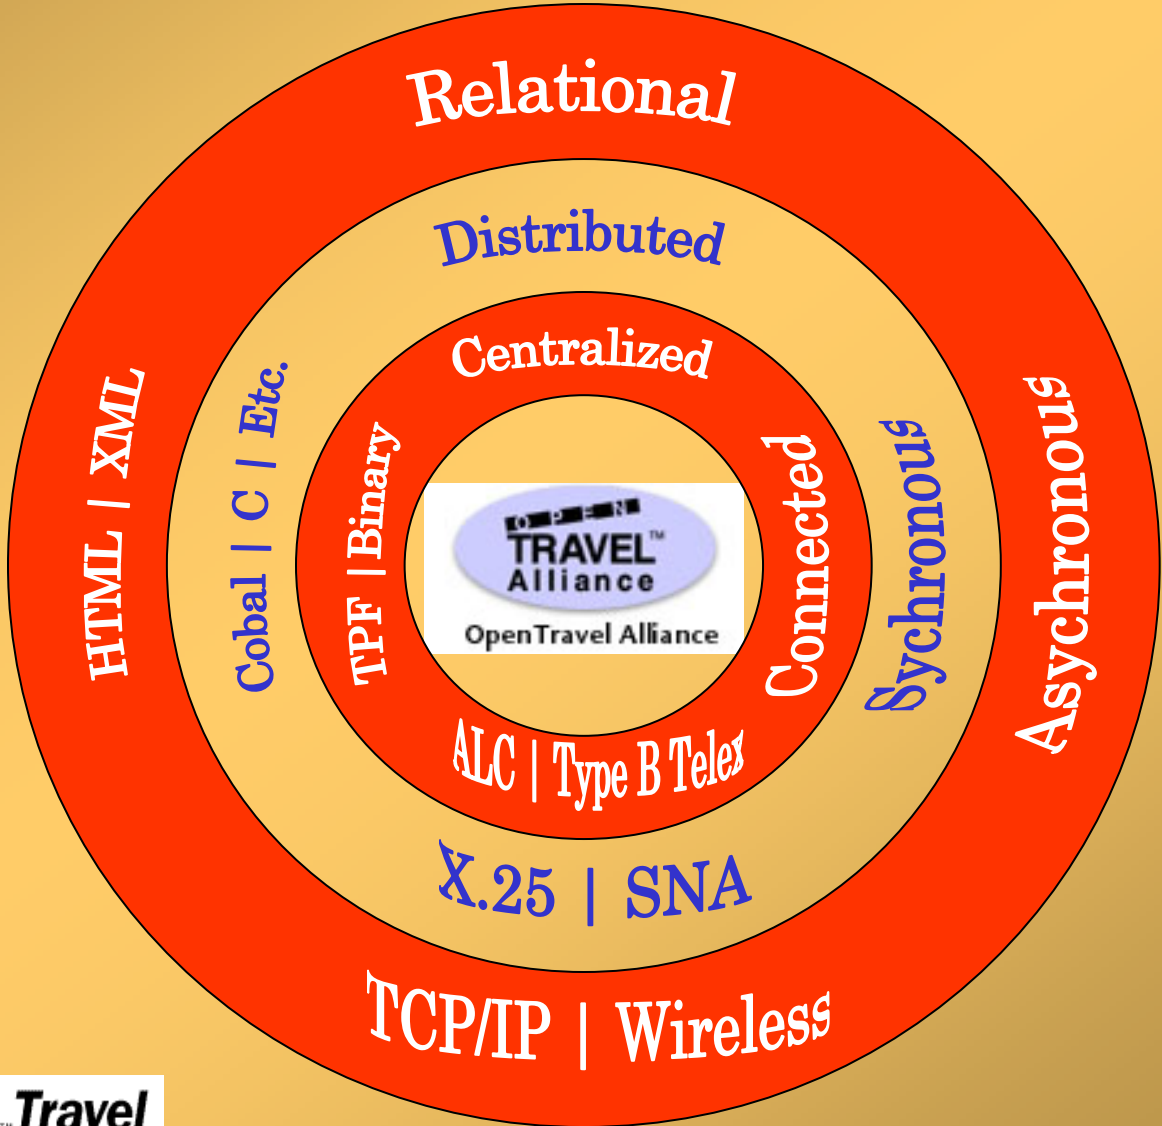

Standards offer...

- Faster exploitation of the Internet
- Easier use of cross-industry technology
- Tighter integration with suppliers and customers
- Lower costs for internal support and maintenance

Even then, not easy task ...

Confronted With...

Layered Linking...

The Reality ...

- **Interactive Protocols**
~
- **Feedback Loops**
~
- **Disparate Technologies**

All about communicating information about your product or service better!!

... Cannot NOT Start a Move to OTA-like Standards

Key Question...

What Happens Every 15 to 20 Years in Almost All Businesses?

A management generation changes. “Most of us form our views of the world in our 20’s ... often out of school. Then for 15 to 20 years you carry out the work of others. Only then, do you become the person making the decisions. Unless you have worked at relearning, your view of the world is 15 to 20 years old!

In the new world of the Information Age and the hyperarchy of communications, are you still making Industrial Age era decisions (i.e. based on learning 15 to 20 years past) as you attempt to ...
